EXV-SF High Lift Pallet Truck with Stand-on Platform  
Detailed Photos

Everything in view, all the time: colour display with a range of language-independent symbols shows you all of the important functions at a glance

Safe even when cornering: automatic speed reduction around corners

Reduces back strain: air suspended stand-on platform adjustable to the individual weight of the driver

High turnover performance due to double deck transport on non-stackable goods

Ready at all times: high availability thanks to optional lateral battery change

Fast and safe: innovative battery plug lock enables fast battery replacement, without the risk of jamming

Maximum power: if the mast is not required, up to 2.0 t can be carried on the initial lift

Maximum turnover performance: 10 km/h top driving speed

## EXV-SF High Lift Pallet Truck with Stand-on Platform

### Power meets innovation

Optimal utilisation of storage area: high storage compaction due to very high residual load capacity

Protects the back: air-cushioned stand-on platform which can be adjusted to individual driver's weight

Everything in view, all the time: colour display with a range of language-independent symbols shows you all of the important functions at a glance

High handling rate due to high driving speeds of up to 10 km/h

The EXV-SF high lift pallet truck is unbelievably fast, extremely strong and highly intelligent. With an extended stand-on platform and lateral protective arms, it accelerates to a top speed of 10 km/h, and moves up to 2,000 kg of pallets in record time. Thanks to its huge residual load capacity, it can also store a great deal at a great height – depending on the mast, storage heights of well over five metres are not a problem. This smart warehouse organiser is also the only high lift pallet truck to date with an informative colour display. As well as displaying basic information, such as the battery's state of charge, numerous language-independent symbols facilitate the optimal operation of this strong high lift pallet truck. Together with its powerful

and low-maintenance motor and its precise control elements suitable for either left- or right-handed operators, it can achieve unprecedented reloading of pallets. Optional load capacity display, speed reduction around corners as standard, and optional combi-tiller provide optimum driver safety and enable the EXV-SF to turn and move easily – even in the most confined spaces. The EXV-SF high lift pallet truck, which is as strong as it is smart, means that you can always keep your flow of goods safely under control; from transporting loads within the pre-storage area to operating the shelving system – and you will be thankful for the stand-on platform over longer distances.

### The 'Simply Efficient' factors: Performance attributes as a measure of economic efficiency

#### Simply easy

- Fatigue-free operation thanks to precise and intuitive electrical steering unit
- Precise even in the tightest of spaces with the help of sensitive proportional valve control
- High availability thanks to straightforward battery change, optionally also on the side of the vehicle
- All the information you need at a glance via a modern and easy-to-read colour display

#### Simply powerful

- Maximum storage compaction due to outstanding residual load capacity and lift height
- Power for two: even multiple-shift use can be handled without a problem thanks to high battery capacity
- High availability due to powerful lithium-ion battery with the option of interim charging

#### Simply safe

- Convenient and safe working: with its individual weight adjustment, the air-cushioned stand-on platform protects the driver's back and joints
- Everything in view: optional load capacity display shows the current mast height and corresponding residual load capacity
- Curve Speed Control allows fast yet safe cornering by automatically adjusting the speed to the steering angle, ensuring the optimal safe distance between forklift and driver via the optional combined tiller

#### Simply flexible

- The right driving programme for every situation: ECO, BOOST or Blue-Q – from maximum handling rate to highest efficiency
- Blue-Q efficiency mode allows energy savings of up to seven percent at the press of a button, with no loss of performance
- Manoeuvrable in tight spaces and narrow aisles thanks to compact dimensions and folding stand-on platform

#### Simply connected

- Easy and transparent web-based truck maintenance with FleetManager 4.x
- Various driver profiles can be saved, allowing straightforward truck use by multiple drivers
- Maximum transparency and needs-based fleet analysis thanks to transmission of comprehensive, use-based data
